WHAT’S IN THE BOX

- JBL Legend CP100 smartphone receiver
- Microphone
- Wiring harness
- 4 mounting screws
- Quick-start guide
- Warranty card
WARNINGS

Please read the following warnings carefully before operating your receiver.

DO NOT ENGAGE WITH FEATURES THAT PREVENT YOU FROM DRIVING YOUR VEHICLE SAFELY
If a function requires extended attention, use it only after coming to a complete stop in a safe location in order to prevent a collision.

KEEP VIEWING OF THE DISPLAY TO A MINIMUM
Excessive interaction with the display can keep you from keeping your eyes on the road and may result in a collision.

MAINTAIN A SAFE VOLUME LEVEL THAT LETS YOU HEAR OUTSIDE NOISES WHILE DRIVING.
High volume levels that prevent you from hearing sounds like emergency vehicle sirens or warning signals (such as at train crossings) are dangerous and might cause a collision. Listening at high volume can also result in hearing loss.

DO NOT DISASSEMBLE OR ALTER THE LEGEND CP100
Alteration to the receiver may result in an accident, fire, or electric shock.

FOR USE ONLY IN VEHICLES WITH A 12-VOLT CHARGING SYSTEM AND NEGATIVE GROUND
Use in vehicles with anything other than a 12-volt charging system could result in accident, fire, or electric shock. If you are not sure if your vehicle uses a 12-volt system, check with your dealer.

WHEN REPLACING FUSES, USE THE CORRECT AMPERE RATING
Using incorrectly rated fuses could result in fire or electric shock.

DO NOT BLOCK VENTS OR RADIATOR PANELS IN THE VEHICLE
Installing the receiver incorrectly can cause heat to build up in the vehicle and could result in fire.

KEEP SMALL OBJECTS OUT OF THE REACH OF CHILDREN
Swallowing objects such as screws may result in serious injury. If swallowed, dial 911 immediately.

DISCONTINUE USE IMMEDIATELY IF A PROBLEM APPEARS
Continued use if a problem occurs could cause personal injury or damage to the product. Return it to an authorized JBL dealer for repair.

PRODUCT CLEANING
Use a soft dry cloth to clean the screen periodically. For severe stains, use a cloth lightly dampened with water only. Use of stronger cleaning agents could damage the screen.

TEMPERATURE
The temperature inside the vehicle should be between +45°C (+113°F) and 0°C (+32°F) before you turn the unit on.

MAINTENANCE
If you encounter problems, do not attempt to repair the unit yourself. Return it to your JBL dealer for service.

INSTALLATION LOCATION
The Legend CP100 is designed to fit in most double-DIN dash openings. Make sure not to install it in a location that is subject to excessive direct sun and heat, high humidity or water, excessive dust, or excessive vibrations.
Mounting

Installing the Legend CP100 will vary from vehicle to vehicle. You’ll need to purchase or fabricate a mounting bracket to secure the receiver in the dash of your vehicle. You’ll also need to purchase a vehicle-specific wiring harness, or splice the receiver’s wires directly to your vehicle’s power and signal wires. If you do not have the necessary tools or experience, do not attempt the installation yourself. Instead, please ask your authorized JBL car audio dealer about professional installation.

⚠️ INSTALLATION WARNINGS AND TIPS

IMPORTANT: Disconnect the vehicle’s negative (−) battery terminal before beginning the installation.
• Always wear protective eyewear when using tools.
• In addition to power and signal connections, you must connect to your parking brake lead, as certain functions will only operate with the parking brake engaged.
• Check the height and depth of your vehicle’s dash cavity (see page 15 for receiver chassis dimensions). Take depth of any extra cables into consideration.
• When making electrical connections, make sure they are secure and properly insulated.

Front-panel buttons

Your Legend CP100 features only three hard buttons on the front panel; all the rest of the receiver’s functions are controlled using the touchscreen or, with select applications, with your voice.

1. **Power button** turns the receiver on and off
2. **Volume button** raises and lowers the volume level
3. **Push-to-talk button** lets you engage Android Auto™ and Apple CarPlay® voice control functions

Rear panel connections

1. **Microphone** required for Bluetooth calls and voice commands with Apple CarPlay or Android Auto
2. **Steering wheel control adapter (sold separately)** lets you control the receiver with your car’s steering wheel controls
3. **Preamp outputs** let you add external amplifiers for more power
4. **Wiring harness** where you plug in the receiver’s power and signal wires
5. **USB input** for plugging in smart devices or a USB drive
Setting up

After installation (or if you’ve disconnected and reconnected your car’s battery), you’ll first need to program the date and time by tapping the arrows on the screen.

When you’ve finished programming both, you can tap the “OK” arrow in the lower right corner to proceed to the home screen.
Home screen

The home screen is your base of operations. From it, you can tap the icons on the screen to select:

- **Phone** to make and receive hands-free phone calls
- **Media** to play MP3 files from USB, or engage Apple CarPlay® or Android Auto™ from your compatible phone*
- **FM** to listen to FM radio broadcasts
- **AM** to listen to AM radio broadcasts
- **Settings** to adjust system settings

*Note: the Media button will change to **USB** when no device or drive is connected to the CP100. It will change to the Apple CarPlay icon when a compatible iPhone is connected to the USB input. It will also change to the Android Auto icon when a compatible Android phone is connected to the USB input.
Settings

Tap “Settings” on the home screen to connect to your Bluetooth devices, change the date/time, activate day or night mode, change languages, and check the software version.
Bluetooth pairing

From the Settings menu, tap **Phone Pairing**. “Start Bluetooth pairing on phone” will appear on the CP100’s screen, along with a pairing code. From your phone’s Bluetooth menu, select the CP100, confirm the code, and allow your phone to pair. The CP100 will then indicate that you have paired successfully.

The CP100 will save the profiles of several phones you’ve paired with it. To reconnect a phone that had previously been paired, tap **Profiles**, then tap the name of the phone in the **Profile List**. Finally, tap “Yes” when prompted by the CP100.
Changing the date and time

To change the date and time, tap **Date & Time** in the Settings menu. You’ll then be able to choose **Date** and **Time**. To change each field, tap the up and down arrows above and below the numerals. When you’re finished, tap the **Home** button.
Changing the system language

To change the system language, tap **Language** in the Settings menu. You’ll then be able to choose **English**, **Spanish**, or **French**.
Using Bluetooth for phone calling

To use Bluetooth, make sure your phone is paired with the Legend CP100, and that the microphone is plugged into the input when you install the receiver. Incoming calls will cause the music to mute. Tap the green button to answer, and the red button to reject. You’ll hear your callers over your speakers, and they’ll be able to hear you.

To control your phone with the Legend CP100, tap the phone menu on the home screen. You can then dial directly using the keypad, pull up Recent calls, and choose Contacts from your phone book.
Playing files from USB drives

To play music you’ve stored on a thumb drive, connect the drive to the USB input and tap the USB icon on the home screen. The playback screen (below, left) allows you to do the following:

• Tap the center button to play and pause.
• Tap the double-arrow buttons to track up and down.
• Repeat tracks and shuffle the contents of the drive by tapping the buttons to the left and right of the track up/down buttons.
• Tap the Album list button to browse the albums on your device.
• Tap the Browse button to enter the drive browser (below, right), where you can search the contents of your drive for artists, albums, genres, playlists, and folders.

Browser

- Artists
- Albums
- Genres
- Playlists
- Folders
Using Apple CarPlay™

To engage Apple CarPlay, the easier way to use your iPhone in the car, connect your compatible iPhone to the USB input using its Lightning-to-USB™ cable. The Apple CarPlay icon will automatically appear on screen; tap it to enter Apple CarPlay menu screen.

Tap the icon of the app you want to use, such as Music, Maps, Messages, Podcasts, Audiobooks, or select audio apps. Press and hold the Apple button at the bottom left or the receiver’s microphone button to engage Siri® for voice control. Swipe left and right to scroll the menu screen. Tap the JBL icon to return to the CP100 home screen.

Press and hold this button to engage Siri for voice control.
Using Android Auto™

To use Android Auto for streamlined control over your compatible Android device, connect it to the Legend CP100 USB input with its USB cable; the Android Auto icon will automatically appear on screen. Tap it to enter the Android Auto home screen.

Use the buttons at the bottom of the screen to use your phone’s navigation app, play music, and make calls. Tap the microphone icon at the upper right of the screen to activate Google Voice™ for hands-free control.

Learn more about Android Auto and see if your phone is compatible at android.com/auto.

Press and hold this button to engage Google Voice for hands-free control.
Listening to FM/AM radio

To listen to FM or AM radio, tap the FM or AM icon on the home screen. You’ll then be able to find stations by tapping the left and right double arrow keys (below, right) or direct tuning. Press the arrow keys once for manual tuning; press and hold for seek tuning. To enter a station directly, tap the “Direct Tune” button.

You can also set up to 10 FM and 10 AM presets. To set one, press and hold a preset button until the station’s frequency appears. When you’re listening to a station, tap the “Station List” button to pull up all of your presets and select the one you want to hear.

JBL Legend CP100 Quick Start Guide

1. Installation
To install the Legend CP100, you’ll need to buy or fabricate a vehicle-specific mounting bracket.

2. Rear panel connections

3. Front-panel buttons
![Diagram of front-panel buttons]

1. Power button turns the receiver on and off
2. Volume button raises and lowers the volume level
3. Push-to-talk button lets you engage Android Auto™ and Apple CarPlay® voice control functions

4. Setting up
After installation, if you’ve disconnected and reconnected your car’s battery, you’ll first need to program the date and time by tapping the arrows on the screen.

Tap “Settings” on the home screen to change languages, activate day/night mode, change audio settings, and make calls by using the onscreen dialer or selecting an contact.

5. Home screen
The home screen is your base of operations. From it, you can tap the screen to select:
- Phone to make and receive hands-free phone calls
- Media to play MP3 files from USB, or engage Apple CarPlay or Android Auto from your compatible phone
- FM to listen to FM radio broadcasts
- AM to listen to AM radio broadcasts
- Settings to adjust system settings

6. Using Apple CarPlay
To engage Apple CarPlay, you simply need to plug your compatible iPhone 5 or iPhone 6 into the USB input and tap the Apple CarPlay button that appears on the home screen. From there, you can use the touchscreen or your voice to control select Apple apps.

7. Using Android Auto
To engage Android Auto, you just plug your compatible Android Phone into the USB input and tap the Android Auto button that appears on the home screen. You can then use the touchscreen or your voice to control select apps. This feature might require you to download Android Auto from the Google Play™ store.

8. Using Bluetooth for hands-free calling
To pair your phone and receiver using Bluetooth, tap the “Phone” button and press “Yes”. Then pull up the pairing screen on your phone and select the CP100. You can now receive calls, and make calls by using the onscreen dialer or selecting an contact.

9. Playing music via USB
To play digital music stored on a USB thumb drive, plug the drive into the USB port, and tap the “Media” button. You can then browse your music by artist, album, genre, and playlist.

10. AM/FM radio
From the home screen, tap FM or AM. You can then find stations by direct tune, auto scan, or manual search. Press the double arrow key once to tune manually; hold the double arrow key to engage seek tuning.

You can save up to 10 presets. To set one, press and hold the preset button until the station’s frequency appears.

Now your car can be on the grid too.
The JBL Legend CP100 in-dash smart phone receiver upgrades your 2-DIN system to a 6.75" touch screen connected car experience. The JBL Legend CP100 is Bluetooth enabled, has a rear camera input, is steering wheel interface ready and provides turn-by-turn navigation through Android Auto and Apple CarPlay.

Making calls, sending messages, finding directions, playing music and navigating all become easier, safer and more intuitive using the JBL Legend CP100. You get traditional AM/FM and smart phone connectivity in one package with a simple, clean interface. Drive Safe. Drive Smart. Drive Connected.

At a glance
- Android Auto and Apple CarPlay Compatible
- Bluetooth® Hands Free
- USB Input
- 20 Watt x 4 Power Amplifier
- Front and Rear Preamp Outputs
- 6.75" Touchscreen Display
Features and Benefits

Compatible with Apple CarPlay and Android Auto
Smartphone navigation, music and calling can be used safely with both Android and iOS devices.

Bluetooth Hands-Free Communication
Make and take phone calls as well as manage contacts and dial directly from your phonebook.

Enjoy Your Smartphones Music
You will enjoy complete control and playback of your music files.

USB Input
The USB input can be used to playback music files from a USB stick with complete navigation of your content.

Back-Up Camera Compatible
Drive safer with more visibility through use of the back-up camera input.

Keep Your Steering-Wheel Controls
Unlike many head unit upgrades available, the CP-100 can be connected to your existing steering wheel controls using a third-party interface.

Lightning Fast
Boot up time and control speed are the fastest currently available in the market today.
