## Maintenance

### Replacing the lithium battery of the remote commander

Under normal conditions, the battery will last approximately 1 year. (The service life may be shorter, depending on the conditions of use.) When the battery becomes weak, the range of the remote commander becomes shorter.

**CAUTION**

Danger of explosion if battery is incorrectly replaced. Replaced only with the same or equivalent type.

1. ![Battery replacement process](image)

**Notes on the lithium battery**

- Keep the lithium battery out of the reach of children. Should the battery be swallowed, immediately consult a doctor.
- Wipe the battery with a dry cloth to ensure a good contact.
- Be sure to observe the correct polarity when installing the battery.
- Do not hold the battery with metallic tweezers, otherwise a short-circuit may occur.

## Cleaning the connectors

The unit may not function properly if the connectors between the unit and the front panel are not clean. In order to prevent this, detach the front panel (page 7) and clean the connectors with a cotton swab. Do not apply too much force. Otherwise, the connectors may be damaged.

Cautions

- Run all ground (earth) leads to a common ground (earth) point.
- Do not get the leads trapped under a screw, or caught in moving parts (e.g., seat railing).
- Before making connections, turn the car ignition off to avoid short circuits.
- Connect the yellow and red power supply leads only after all other leads have been connected.
- Be sure to insulate any loose unconnected leads with electrical tape for safety.

Precautions

- Choose the installation location carefully so that the unit will not interfere with normal driving operations.
- Avoid installing the unit in areas subject to dust, dirt, excessive vibration, or high temperature, such as in direct sunlight or near heater ducts.
- Use only the supplied mounting hardware for a safe and secure installation.

Note on the power supply lead (yellow)
When connecting this unit in combination with other stereo components, the amperage rating of the car circuit to which the unit is connected must be higher than the sum of each component’s fuse amperage rating.

Mounting angle adjustment
Adjust the mounting angle to less than 45°.

Parts List for Installation

- This parts list does not include all the package contents.
- The bracket ① and the protection collar ③ are attached to the unit before shipping. Before mounting the unit, use the release keys ② to remove the bracket ① from the unit. For details, see “Removing the protection collar and the bracket” (page 35).
- Keep the release keys ② for future use as they are also necessary if you remove the unit from your car.
Connection

Making connections

1. To a common ground (earth) point
   First connect the black ground (earth) lead, then connect the yellow and red power supply leads.

2. To the +12 V power terminal which is energized at all times
   Be sure to first connect the black ground (earth) lead to a common ground (earth) point.

3. To the +12 V power terminal which is energized when the ignition switch is set to the accessory position
   If there is no accessory position, connect to the +12 V power (battery) terminal which is energized at all times.
   Be sure to first connect the black ground (earth) lead to a common ground (earth) point.

4. To the power antenna (aerial) control lead or the power supply lead of the antenna (aerial) booster
   It is not necessary to connect this lead if there is no power antenna (aerial) or antenna (aerial) booster, or with a manually-operated telescopic antenna (aerial).

5. To AMP REMOTE IN of an optional power amplifier
   This connection is only for amplifiers and a power antenna (aerial). Connecting any other system may damage the unit.

6. To a car's illumination signal
   Be sure to first connect the black ground (earth) lead to a common ground (earth) point.

Subwoofer Easy Connection

You can use a subwoofer without a power amplifier when it is connected to a rear speaker lead.

Speaker connection

- Before connecting the speakers, turn the unit off.
- Use speakers with an impedance of 4 Ω to 8 Ω, and with adequate power handling capacities to avoid damage.

Installing the microphone

To capture your voice during handsfree calling, you need to install the microphone (6).

Cautions

- It is extremely dangerous if the cord becomes wound around the steering column or gearstick. Be sure to keep it and other parts from interfering with your driving operations.
- If airbags or any other shock-absorbing equipment is in your car, contact the store where you purchased this unit, or the car dealer, before installation.

Memory hold connection

When the yellow power supply lead is connected, power will always be supplied to the memory circuit even when the ignition switch is turned off.

Using the wired remote control

When using the steering wheel remote control

Installation of the connection cable RC-SR1 (not supplied) is required before use.

1. To enable the steering wheel remote control, select [SET STEERING] → [EDIT CUSTOM] to make the registration (page 19).
   When the registration completes, the steering wheel remote control becomes available.
Notes on installing the connection cable RC-SR1 (not supplied)
• Refer to the support sites on the back cover for details, then connect each lead properly to the appropriate leads. Making an improper connection may damage the unit.
• Depending on the type of car, be sure to insulate the unused leads with electrical tape for safety.
• Do not connect this cable when the steering wheel remote control is not used.
• Consulting the dealer or an experienced technician for help is recommended.

When using the wired remote control
1 To enable the wired remote control, set [STR CONTROL] in [SET STEERING] to [PRESET] (page 19).
