1. Open the center console lid and remove the cup holder cover.

2. Expose bottom of the console by unseating the upholstery edge and pulling it down.

3. Pull the foam down to expose the backside of the media port.

4. Push tabs and push the module forward to release it.

5. Disconnect the plugs then depress the 4 locking tabs (2 on top and 2 on the bottom) and push the module forward to release it.

6. Release locking tabs and pull the board out.

7. Remove plastic ends and screws from PCB board.

8. Reinstall plastic ends and screws back on new PCB board.

9. Slide board back into casing until the tabs lock in place.

10. Reinsert the module and reassemble the center console.
